AGENDA

1.Process issues

- EPA pesticide/chemicals leadership
- impacts of reduced EPA budget
- EPA comment periods in new administration
- EPA response to petitions
- EPA use of conditional registrations in light of flubendiamide cancellation proceedings
- EPA regulatory rollbacks

2.Chlorpyrifos decision

Questions about decision-making process and avenues for public participation.

3.Endangered Species Act

Biological assessments for chlorpyrifos, diazinon and malathion – input from Dow et al.

4.Worker Protection Standard

- Update on process for approving WPS training materials from non-EPA funded entities
- Update on the bilingual label project

5.Atrazine

Changes in the aquatic life benchmark.

6.Glyphosate

Glyphosate risk assessment process, scientific studies, role of Monsanto.

7.Carbofuran

FWS investigators confirmed that this largely-banned pesticide was responsible for the many bald eagle deaths in DelMarVa.

8.Pollinators (to extent not covered in PPDC)

- Treated Article Exemption and coated seeds
- National Pollinator Strategy
- Biological opinions for listed species including aquatic invertebrates?
- Ecological risk assessments

9.Contraceptive pest control

- Avitrol risk assessment final work plan
- Update on contraceptive pest control technologies – ContraPest, OvoControl, etc.

10.Migratory Bird Treaty Act

Rollout and implementation plans
